

JOSEPH WIMSATT

Mechanical Systems Specialist | Aviation Maintenance Trainee

150 Beveridge Rd, Seguin, TX 78155 | 502-650-7484 | Wimsattj@att.net

PROFESSIONAL SUMMARY

Detail-oriented mechanical systems specialist seeking to transition into aviation maintenance. Extensive experience in precision troubleshooting, equipment maintenance, and complex system diagnostics across mechanical, electronic, and control systems. Self-directed learner with proven ability to master technical documentation, apply systematic problem-solving methods, and work to exacting tolerances. Experienced in performing own vehicle maintenance and repairs. Committed to safety protocols with OSHA 30 certification and CPR/First Aid training. Eager to apply transferable skills to aircraft maintenance and pursue professional development in aviation.

CORE COMPETENCIES

- Mechanical Systems Diagnosis & Repair
- Electronics & Control Systems
- Precision Measurement & Calibration
- Technical Documentation Interpretation
- Equipment Troubleshooting
- Quality Control & Inspection
- Vehicle Maintenance & Repair (Personal)
- Welding Experience (Stick 7018)
- Forklift & Aerial Lift Operation
- OSHA 30, CPR, First Aid Certified
- Bilingual: English/Spanish
- Computer Programming & Systems

TECHNICAL SKILLS

Mechanical & Systems: Equipment assembly/disassembly, precision measurement (micron-level tolerances), gear systems, fastener specifications, materials selection, thermal management, vibration analysis, diagnostic procedures

Electronics & Controls: Circuit diagnostics, sensor integration, control board troubleshooting, wiring systems, logic troubleshooting, stepper motor systems, firmware configuration

Tools & Equipment: Hand tools, power tools, precision measuring instruments, welding equipment, forklift (improved surface & rough terrain), aerial lifts, diagnostic equipment

Computer Systems: Technical documentation systems, diagnostic software, programming (Pascal, C, C++, JavaScript, HTML, CSS), computer assembly/repair, firmware configuration

Safety & Compliance: OSHA 30, OSHA 10, CPR, First Aid, scaffold erection/use, safety protocol implementation, hazard identification

PROFESSIONAL EXPERIENCE

Industrial Maintenance & Technical Specialist

Various Employers | 2010 - Present

- Performed complex troubleshooting of mechanical and electronic systems requiring systematic diagnostic approaches
- Maintained and repaired industrial equipment including metal fabrication machinery, concrete forming systems, and automated equipment
- Conducted precision measurements and calibrations to ensure equipment operated within specification tolerances
- Read and interpreted technical manuals, schematics, and specifications for equipment repair and maintenance
- Performed welding repairs and modifications on industrial equipment and structures
- Operated and maintained forklifts, aerial lifts, and other material handling equipment safely
- Completed equipment inspections and preventive maintenance according to established schedules
- Maintained detailed maintenance logs and documentation of repairs performed

Computer Systems Technician

NetComet Computers | Previous

- Diagnosed and repaired electronic systems, circuit boards, and control systems
- Performed component-level troubleshooting of complex electronic assemblies
- Configured firmware and control systems for optimal performance
- Provided technical support and training to customers on system operation
- Designed and implemented system solutions based on customer specifications

Acting Supervisor & Management Experience

AutoZone (6 months) | Advance Auto Parts (12 months)

- Supervised technical operations and staff in fast-paced automotive parts environment
- Provided technical guidance on automotive systems and repair procedures

- Managed inventory, quality control, and customer technical support
- Trained staff on product knowledge and diagnostic procedures

Metal Sorting & Material Handling

ELG Metals

- Performed metal sorting, identification, and classification operations
- Operated material handling equipment including forklifts in industrial environment
- Conducted visual inspections and quality checks on materials
- Maintained accurate inventory records and material documentation

Retail & Customer Service

Sears

- Provided customer service and technical product knowledge
- Assisted customers with product selection and specifications
- Maintained inventory and store operations

EDUCATION & TRAINING

Associate Degree in Applied Science - Carpentry Technology

IvyTech Community College | I.K.O.R.C.C. Training Center

- Materials science and structural analysis
- Blueprint reading and technical documentation
- Precision measurement and quality control
- Applied technical problem-solving

Computer Programming & Technical Studies (3 Years)

Nelson County High School - Vocational Program

- Advanced mathematics: Calculus, geometry, trigonometry, statistical analysis
- Computer programming: Turbo Pascal, dBase, BASIC, C, C++
- Systems analysis and logical problem-solving

Professional Certifications

- OSHA 30-Hour Safety Certification (Current)
- OSHA 10-Hour Safety Certification
- Welding Experience - Stick 7018 (Previously Certified)

- Forklift Operator Certification (Improved Surface & Rough Terrain)
- Aerial Lift Operator Certification
- CPR & First Aid Certified
- Scaffold Erector & User Certification

KEY STRENGTHS

- **Systematic Problem-Solver:** Approach complex technical issues methodically using logical troubleshooting and root-cause analysis
- **Precision-Oriented:** Understand when tolerances matter and capable of working to exacting specifications
- **Self-Directed Learner:** Rapidly acquire new technical knowledge through independent study of manuals, specifications, and technical documentation
- **Multi-Domain Technical Knowledge:** Bridge mechanical, electronic, and computer systems for comprehensive troubleshooting
- **Safety Conscious:** Maintain current safety certifications and consistently apply proper safety protocols
- **Quality Focused:** Committed to finding optimal solutions and understanding root causes rather than applying temporary fixes
- **Bilingual Communication:** Over 12 years of fluent Spanish communication in technical and professional environments

ADDITIONAL INFORMATION

Personal Vehicle Maintenance: Perform own mechanical repairs and maintenance on personal vehicles including diagnostics, engine work, electrical systems, and preventive maintenance.

Availability: Open to training opportunities including potential pilot certification programs.

Work Authorization: Authorized to work in the United States.
